Alpha Wire Statement on the use of PFAS substances

Alpha Wire has completed a high-level analysis of the use of PFAS substances in our products. In this analysis, a PFAS substance is defined as a material that has a carbon-fluorine bond. Basically, this encompasses any fluoropolymers including but not limited to FEP, PVDF, ECTFE, TFE, and ETFE. This analysis may be found at [REACH-RoHS-PFAS](#).

Alpha Wire is committed to fulfilling our obligations and to being a responsible partner in addressing concerns about the health and environmental impacts our products. This statement will be updated should there be any updates relative to PFAS.

Authorized Signatory for the Alpha Wire Company:

DAVE WATSON

Director of Engineering

Alpha Wire
