To Whom It May Concern:

Re: Persistent Organic Pollutants in Alpha Wire Products

The Products of Alpha Wire in all colors and put-ups, except as noted below, do not contain any Persistent Organic Pollutants (EU POP) regulation (EU) 2019/1021 as updated on 30 May, 2023, including, but not limited to, all PFOA and PFOS restrictions listed in Annex I, Part A of the regulation.

Certain products of Alpha Wire contain in Dechlorane Plus in the insulation material, and hence, are not POP compliant. As Dechlorane Plus is a SVHC under REACH one may check to see if a certain Part number is REACH compliant at [REACH-RoHS-Status](#). If a product is listed as non-REACH complaint, it may not be POP compliant

The information provided in this Product Disclosure, and the identification of materials listed as reportable or restricted within the Product Disclosure, is correct to the best of the knowledge of Alpha Wire, information and belief at the date of its publication. The information provided in the Product Disclosure is designed only as a general guide for the safe handling, storage, and any other operation of the product itself or the one that it becomes a part of. This Product Disclosure is not to be considered a warranty or quality specification. Regulatory information is for guidance purposes only. Product users are responsible for determining the applicability of legislation and regulations based on their individual usage of the product.

Please let me know if there are any further questions.

Sincerely,

DAVE WATSON
