

For your safety, upon receipt of your Distribution Rack, read this instruction sheet carefully before starting any installation and assembly.

CAUTION:

This Distribution Rack system must be anchored securely to the floor in order to minimize the potential of accidentally tipping the unit during equipment installation. Anchoring and selection of hardware should be performed by qualified personnel only. Anchoring hardware should be a minimum of 5/8 diameter.

Before Un-packaging your Four Post Rack read below.

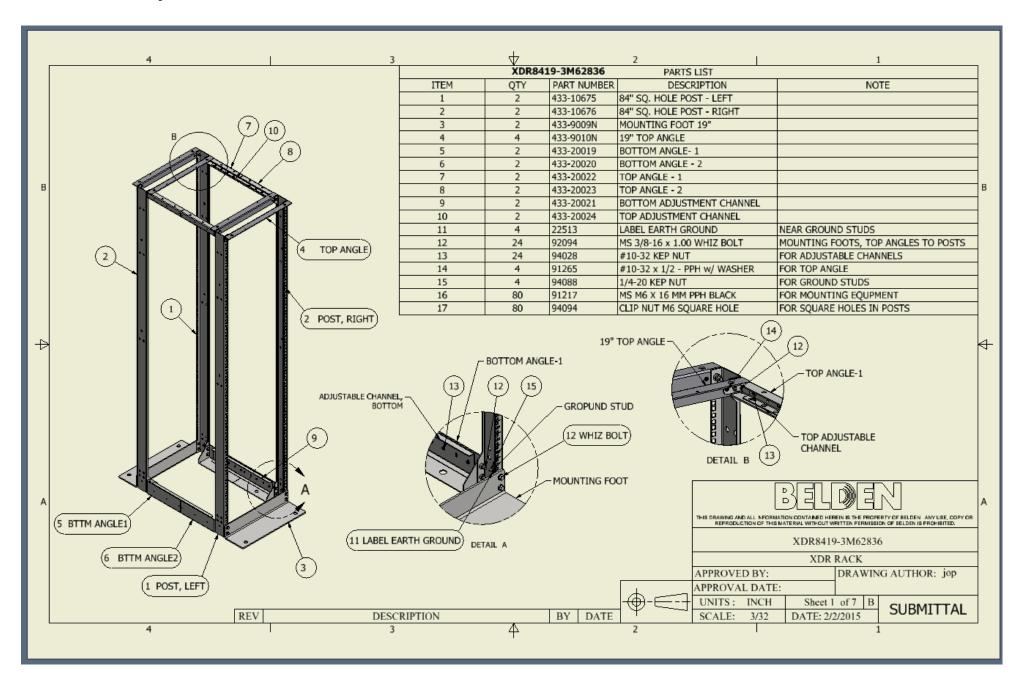

This distribution rack is shipped unassembled in one package, banded and shrunk wrapped to a skid. An assembly hardware package is provided in order to assemble the unit. In addition, a number of screws are provided for mounting equipment.

Please make sure upon receipt of delivery that your packaging is intact. Inspect the packaging for any noticeable damage. If there is damage, please notify the freight carrier immediately to file a damaged freight claim.

Once you have inspected the packaging for any damage; carefully remove the wrapping and banding from the skid and the packaging from around your rack components and check all items received against the part list for XDR8419-3M62836

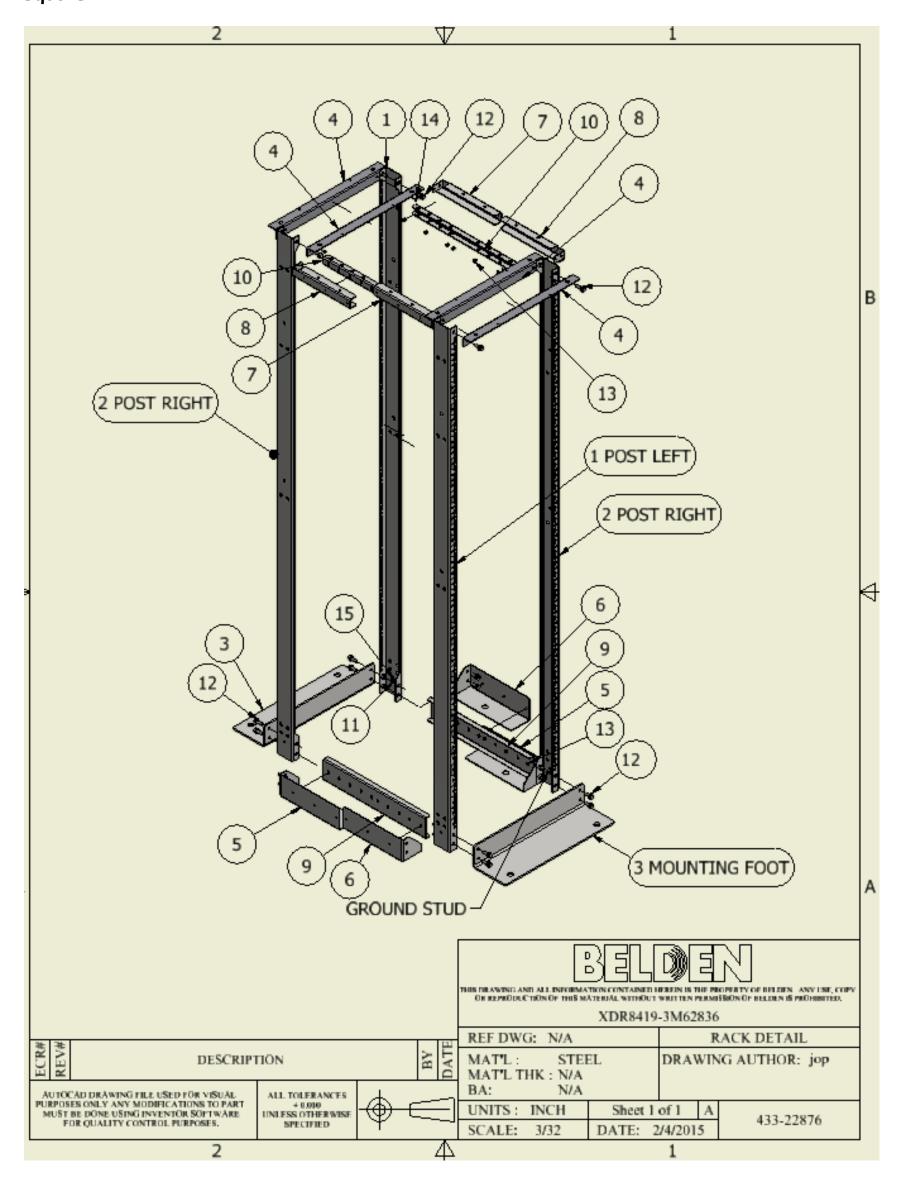

Before you begin, compare the packaged components received with the PARTS LIST below to make sure all parts shown are included.

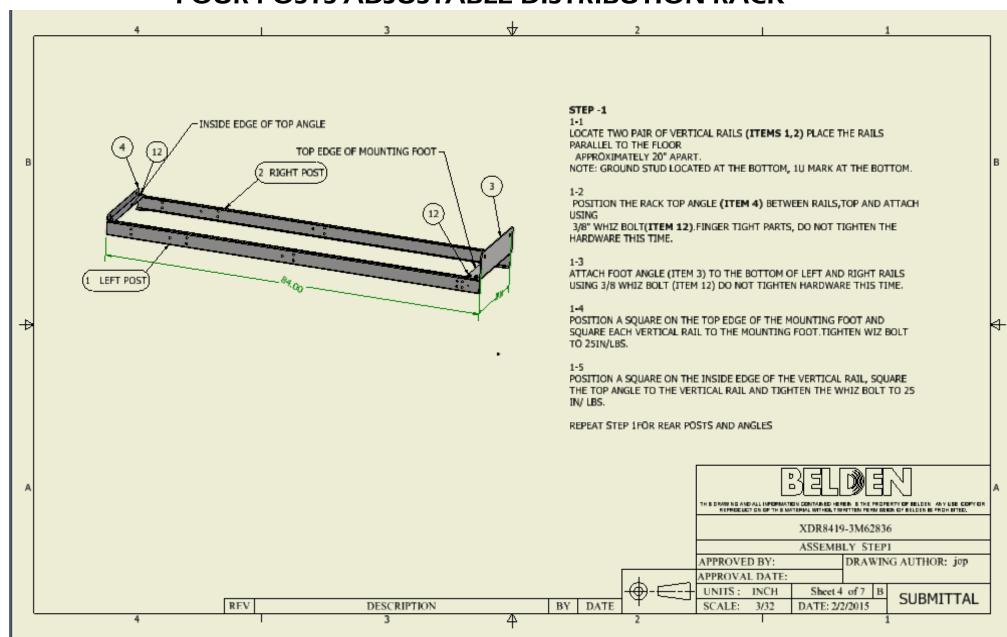

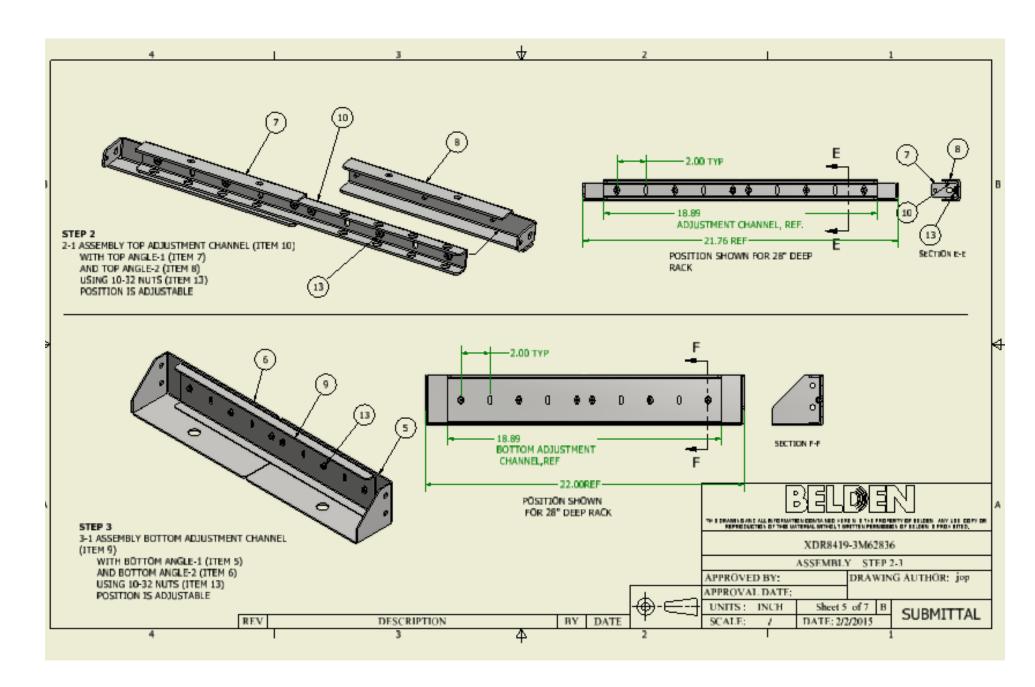

You are now ready to assemble the Rack

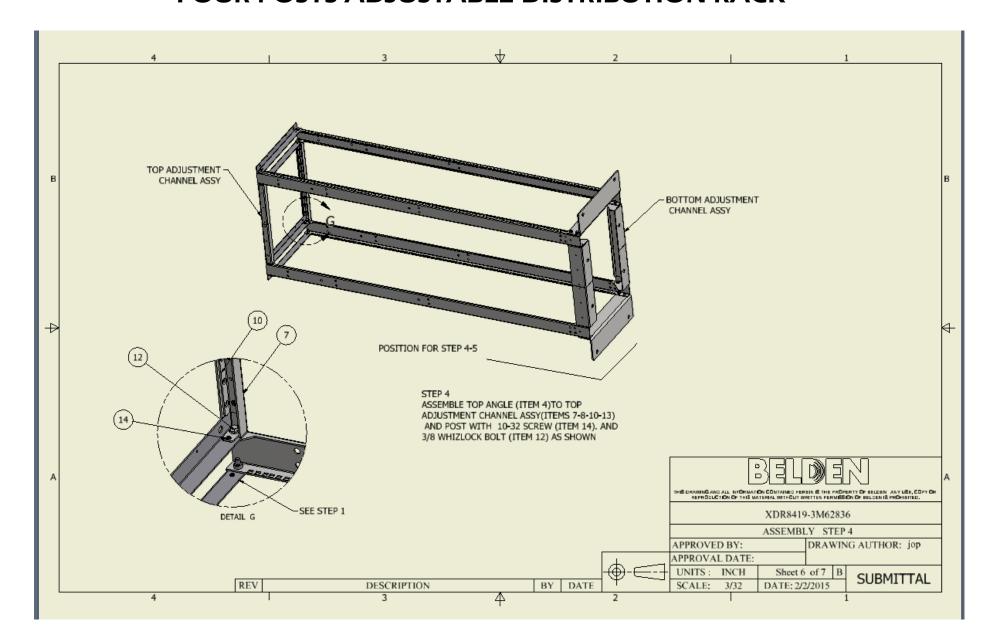

The following tools are required for assembly of this rack:

- 9/16" Open End or adjustable Wrench
- Phillips Screwdriver
- Square

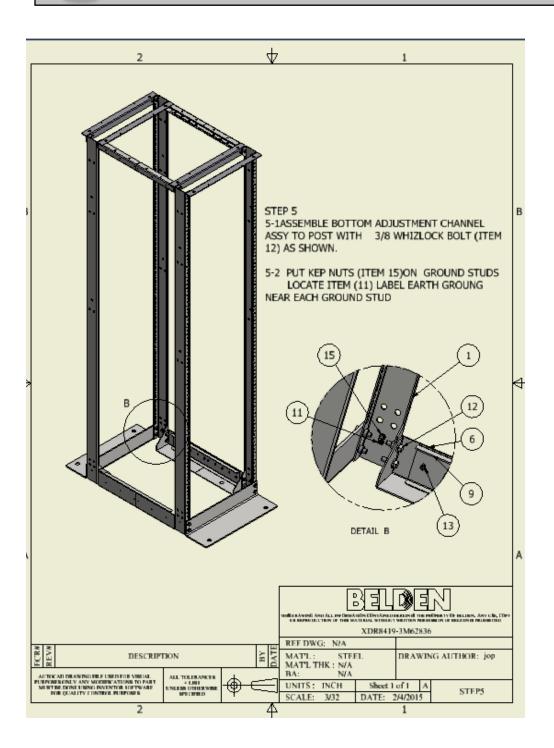

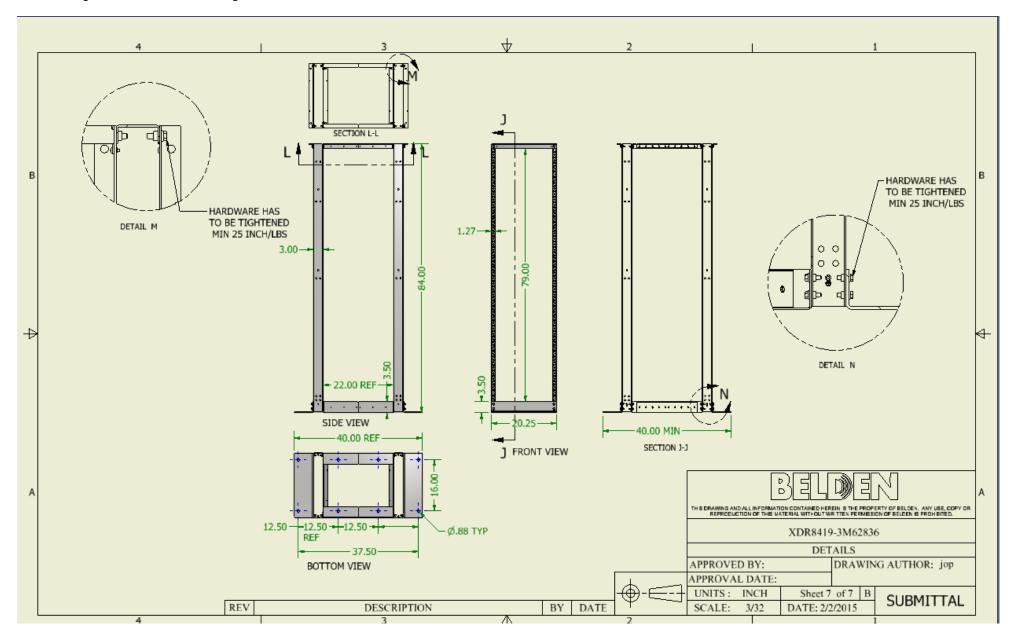

CAUTION: 2 PEOPLE ARE REQUIRED TO RAISE ASSEMBLY TO VERTICAL POSITION. ALL HARDWARE NEEDS TO BE ATTACHED AND TIGHTENED MIN 25 INCH/LBS

NOTE: You have now assembled your XDR Series Four Post adjustable Rack and are ready to continue to anchor your rack securely to the floor

Anchoring Hardware should be a minimum of 5/8" diameter

Important Note: The distribution rack system should be anchored securely to the floor. Due to building code and substrate variations we do not supply the anchoring hardware. Qualified personnel knowledgeable of local code should ONLY perform anchoring of this rack.

Grounding Stud

Four, 1/4-20 X 3/4" long Grounding Studs are provided centered inside the left and right frame channels at a location approximately 2.5" up from the bottom A 1/4-20 hex nut with a captive external tooth lock washer (Part Number 94088) is provided for attachment of the ground lug (not supplied). The hex nut assembly is used to secure the ground lug in place.

Equipment Installation

Your Distribution Rack is provided with four mounting rails with .375" Sq. holes. Your rail EIA rack units are marked for ease of panel and equipment alignment from rail to rail on the front and rear flanges. (80) Mounting hardware provided.

You can now install your equipment
