

position CE - conformity declaration

CE conformity declaration for our products is based on the following EU directives:

- 2014/30/EU - electromagnetic compatibility directive (EMC)
- 2014/35/EU - low voltage directive (LVD)
- 2011/65/EU - RoHS II – directive,
effective July 22, 2017 for monitoring and control instruments
and effective July 22, 2019 for industrial connectors

CE identification marking is mandatory for active and passive equipment, which fulfills the requirements of the directives listed above.

The low voltage directive shall apply to electrical equipment designed for use with a voltage rating of between 50 and 1 000 V for alternating current and between 75 and 1 500 V for direct current.

Excluded from this directive are so-called basic components, if their safety evaluation in line with this directive can only be made when installed. Such products are field attachable connectors, receptacle connectors, pigtails and single components.
