Magnum DX940e
Industrial Cellular Router

With more configurable ports and extensive Verizon-certified 4G/LTE capability, this compact industrial router brings enhanced flexibility and security to remote access.

Offers **enhanced connectivity** with high-speed Verizon, AT&T and worldwide 4G/LTE cellular interface for secure remote access

Uses **high-end, robust cybersecurity mechanisms** with advanced safety features, IP routing and guaranteed network protection with firewall layers

Integrates seamlessly into existing infrastructures through up to six highly configurable Gigabit Ethernet interfaces and legacy leased circuits for backward compatibility

**Key Features**

- High-speed all-Gigabit Ethernet interfaces, with up to six ports
- Verizon-certified 4G/LTE cellular interface for North American markets to provide secure remote connectivity
- T1/E1/DDS or GbE for WAN support; Multiple Gigabit Ethernet and serial ports for LAN
- NERC-CIP compliant for secure data transfer across public networks
- RS232 and RS485 protocols-based Serial-to-IP conversion for backward compatibility and interfacing with legacy equipment
- Enhanced cybersecurity capabilities: SSL/TLS encryption, IPSec-VPN tunneling, Layer 3 Firewall and secure IP routing with advanced RIP, OSPF and BGP features
- Operating temperature range of -40°C to +85°C

Now backed by Verizon's certified 4G/LTE technology, the Magnum DX940e Industrial Cellular Router features enhanced VPN and firewall capabilities for secure, NERC-CIP compliant data transfer over public networks.
Reliable, Secure Connections for Cellular Communication

Data requirements and compliance standards are on the rise, including NERC CIP’s requirement for higher security protocols to safeguard information traveling from one place to another. When data is traveling to its end destination, especially over far distances, it is imperative that networks are secure and reliable, so critical information can be deployed without interruption.

In addition to the need for improved security measures, more devices are accessing the internet since the introduction of the IIoT. 4G/LTE capabilities are the crucial gateway to ensuring continuous wireless connectivity. The DX940e supports all ranges of connectivity, but it is most beneficial for secure remote access and serial communication. The heightened connectivity is supported by NERC CIP standards to ensure end-receiver devices are safe from both physical and cyber threats.

The firewall and encryption features within the DX940e meet these standards and more by supporting VPN connectivity.

Applications

The DX940e is ideal for applications that require high-speed and secure data transfer remotely over long distances, especially those where cellular signals are readily available. The router’s ruggedized, compact and flexible design helps with integration into tight infrastructures and compliance with NERC CIP standards makes it ideal for both wired and cellular WAN networks.

Markets

The DX940e is best suited for utility markets, including energy and power, transmission and distribution, smart grids and substations, bringing reliable connectivity into hard-to-reach places. Roadside traffic controls, transportation stations and other locations where cellular signals are critical will also benefit from this upgraded router. The device can be placed on both moving vehicles and used in control rooms, providing user and communication metrics. The oil and gas industry is another suitable application for the DX940e, as the router can withstand harsh conditions in moisture-rich environments.

With up to six configurable Gigabit Ethernet ports, Belden’s Magnum DX940e utility router offers dynamic routing protocols and enhanced cybersecurity features for highly configurable and secure remote communication.
### Technical Information

**Type**

<table>
<thead>
<tr>
<th>DX940e</th>
</tr>
</thead>
</table>

**Product Description**

DX940e base unit with configurable four 1000Mb or 100Mb SFP Ethernet or 10/100/1000 RJ45 ports. Other additions: 4 serial, 2 gigabit fiber/copper, choice of two WAN access ports (4G/LTE Cellular, T1/E1, DDS WAN). Includes IP routing, Ethernet switching and secure management. MNS-DX software license included. Panel mount. Panel, DIN-RAIL or Rack mounting options and conformal coating is also available.

### Specifications

**Serial Protocols**

Async to TCP/IP – including Modbus gateway for connectivity to serial Modbus devices and to other Modbus Ethernet devices; TCP/IP to serial/reverse terminal server, Serial Multimode & Multimaster Topologies; PPP with authentication.

**Performance**

**Serial DB9 Ports**

RS232/RS485 software selectable DB9 interface. Serial data rate from 300 bps to 230.4 kbps. Data length: 1 to 32 bits.

**RJ45 Ports**

10/100 Mb speed, full- or half-duplex mode. 1000 Mb speed full-duplex mode. Each port individually determined, auto-negotiation and auto-cross

**Fiber Ports**

(Multi-mode and Single-mode)

Configurable 100Mb or 1000Mb speed (based on the SFP type). 100 Mb speed with FDX or HDX, default is FDX mode. 1000 Mb speed with FDX only. Max. 6 SFP (Small Form-factor Pluggable) for high fiber port density.

**Cellular WAN Ports**

4G/LTE Bands: Americas/EMEA (B1, B2, B3, B4, B5, B7, B12, B13, B20, B25, B26, B29, B30, B41); APAC (B1, B3, B5, B8, B18, B19, B21, B28, B38, B39, B40, B41)

3G/WCDMA Bands: Americas/EMEA (B1, B2, B3, B5, B7, B8); APAC (B1, B5, B6, B8, B9, B19)

3G/TD-SCDMA Bands: APAC (B39)

**Wired WAN Ports**

WAN Ports DDS: 56/64kb OR T1/E1: 1.544Mb / 2.048Mb G.703; Full rate and fractional (N*56/64kb); Integral CSU/DSU

**Network Standards**

Auto-Negotiation on TP

IEEE 802.3z, 802.3ab, 802.1p: 100BASE-TX, -FX, 1000BASE-TX, -FX

Flow Control & Prioritization

TP, IEEE 802.3u

VLANs

Max. 4k VLAN-entries

Spanning Tree

IEEE 802.1D STP; IEEE 802.1D-2004 RSTP

Diffserv

IEEE 802.1p: Diffserv, traffic prioritization for routed IP flows/ports

**Software**

Software

MNS-DX, MNS-DX-ADVAR and MNS-DX-SECURE licensed software

**Management & Diagnostics**

Ease-of-Use

Industrial HiVision or Web-based Graphical User Interface (GUI) or CLI access via SSH or Telnet. Powerful built-in protocol analyzer to assist with troubleshooting.

Other

**Operating Environment**

Operating Temperature

IEC 60068 Operating temp. per “Type Test 4 hours” -40 °F to 185 °F (-40 °C to +85 °C)

Temperature Rating (Components)

UL 60950 “Component Parts” temperature rating: 140 °F (+60 °C)

Storage Temperature

-40 °F to 185 °F (-40 °C to +85 °C)

Ambient Relative Humidity

5% to 95% (non-condensing)

Altitude

-200 to 13000 ft (-60 to 4000 m)

Conformal Coating (Humidity Protection)

Please refer to Configuration Guide section Step 7 for available conformal coating options

**Mechanical**

Enclosure

Rugged high-strength sheet metal

Mounting

19” ETSI and 23” Rack, Panel Mount and DIN-Rail

Cooling Method

Convection

Dimensions

9.5” W x 9.0” D x 1.75” H (24.13 x 22.86 x 4.45 cm); 1 RU

Weight

5 lbs (2.3 kg)

**Power Supply Options**

High Voltage

90 to 250 V AC or DC, 50 to 60 Hz, 0.2 A

Low Voltage

24 to 48 V DC, 0.75 A

Power Consumption

33 Watts for fully loaded Fiber configuration; 20 Watts minimum

**Serial LED Indicators**

Per DB-9 or RJ45 Port

One LED/port indicating active connection.

**Ethernet LED Indicators**

Per RJ45 or Fiber Port

Link/Activity One LED/port indicating Link (solid green) and Activity (blinks to indicate activity).

**Approvals**

Declaration of Conformity

CE, FCC, EN 60950

Safety of Industrial Control Equipment

cUL508

Railways

EN 50155

Substation

IEC 61850-3, IEEE 1613

Traffic Control

NEMA TS-2 & TEE5

**Warranty**

Warranty

Three Years
