OCTOPUS OS24/34
Managed PoE Switches

Hirschmann’s OCTOPUS OS24/34 Power over Ethernet (PoE) switches optimize power and reliability while lowering the cost of network design and expansion.

Key Features
- Power sourcing equipment in accordance with IEEE 802.3at requirements
- Fast and full Gigabit Ethernet 120 Watt PoE power
- Manual PoE management per port
- Electrical or optical Gigabit uplink-ports and Fast Ethernet M12 ports
- IP67/IP65 protection degree rating and metal housing for harsh environments
- Industry-approved for use onboard and along tracks

Increase network performance and efficiency with 120 Watt PoE budget

Optimize power distribution to end devices with manual PoE management per port

Ensure reliability in extreme environments with robust, industry-approved design

With 120 Watt PoE, the OCTOPUS OS24/34 devices require less cabling to end devices and ensure the highest performance within harsh, condensed operating spaces.
Increase Network Performance and Efficiency

Industrial engineers can now get twice the Power over Ethernet (PoE) when designing or expanding their networks. The OCTOPUS OS24/34 Managed PoE Switches from Hirschmann are 120 Watt PoE sourcing devices with an extended total power budget, which increases the number of powered network devices connected to the switch.

With internal PoE capability and cabinet-less mounting, the switches require less cabling and are space-saving, economical options for tight, harsh industrial environments, such as onboard or trackside rail settings.

The switches are equipped with various hardware and software features for the best cost efficiency and meet IP65 and IP67 ratings, offering the highest level of flexibility and reliability amidst exposure to shock, vibration, water, dust and extreme temperatures.

Applications

The switches have added PoE+ support for reduced cabling, and their power supplies meet multiple input voltage ranges. The switches offer high-vibration resistance and broad protection to electrostatic discharges. With an IP65 and IP67 rating, the switches meet the requirements of switching and routing functions in waterproof and dust-tight housings for mounting outside of cabinets and operate at temperatures ranging from -40 °C to +70 °C.

Markets

The OCTOPUS OS24/34 switches are designed for a range of application scenarios in transportation, manufacturing and machine building environments, including onboard networks; information systems in train stations; conveyer systems; and traffic surveillance on highways, bridges and in tunnels.

Enhanced OCTOPUS OS24/34 PoE switches from Hirschmann now include a 120 Watt Power over Ethernet (PoE) option, which provides greater power to more network devices and helps customers keep up with evolving network requirements.
## Technical Information

### Product Description

<th>OCTOPUS OS34-xx24xx-xxPPxx</th>
</tr>
</thead>
</table>

### Example Images

- ![Image 1](image1.png)
- ![Image 2](image2.png)

### Description

Managed IP65/IP67 switch in accordance with IEEE 802.3, store-and-forward-switching and routing, electrical and optical Fast-Ethernet (10/100 Mbit/s) and Gigabit-Ethernet (10/100/1000 Mbit/s), M12 ports (TX), IEC ports (FX), PoE+

### Port Type and Quantity

- Up to 20 ports, thereof max. 4 GE TX or FX, up to 15 PoE+
- Up to 28 ports, thereof max. 4 GE TX or FX, up to 15 PoE+

### Network Size – Length of Cable

- Twisted Pair (TP): 0 to 100 m
- Fibre (FX): 0 to 116 km

### Power Requirements

- Operating Voltage: 54 V DC

### Ambient Conditions

- Operation Temperature: -40 °C to +70°C
- Relative Humidity (also-condensing): 10% to 100%

### Mechanical Construction

- Dimensions (W x H x D): 261 x 189 x 105 mm / 338 x 189 x 105 mm
- Weight: 3600 g / 4100 g
- Protection Class: IP65 and IP67

### Software

- Switching: Independent VLAN Learning; Fast Aging; Static Unicast/Multicast Address Entries; QoS / Port Prioritization (802.1D/p); TOS/DS/DCP Prioritization; Interface Trust Mode; CoS Queue Management; IP Ingress DiffServ Classification and Policing; Queue-Shaping / Max. Queue Bandwidth; Flow Control (802.3X); Egress Interface Shaping; Ingress Storm Protection; Jumbo Frames; VLAN (802.1Q); Protocol-based VLAN; VLAN Unaware Mode; GARP VLAN Registration Protocol (GVRP); Voice VLAN; MAC-based VLAN; IP subnet-based VLAN; GARP Multicast Registration Protocol (GMRP); IGMP Snooping/Querier per VLAN (v1/v2/v3); Unknown Multicast Filtering; Multiple VLAN Registration Protocol (MRVP); Multiple MAC Registration Protocol (MMPR); Multiple Registration Protocol (MRP)
- Redundancy: Device Level Ring (DLR); HIER-Ring (Ring Switch); HIER-Ring over Link Aggregation; Link Aggregation with LACP; Link Backup; Media Redundancy Protocol (MRP) (IEC62439-2); Fast MRP (IEC62439-2); MRP over Link Aggregation; High Availability Seamless Redundancy Protocol (HSR) (IEC62439-3); Parallel Redundancy Protocol (PRP) (IEC62439-3); Redundant Network Coupling; Sub Ring Manager; RSTP 802.1D-2004 (IEC62439-1); MSTP (802.1D); RSTP Guards; VRP; VRP Tracking; HVRP (VRP enhancements)
- Management: DNS Client; Dual Software Image Support; TFTP; SFTP; SCP; LLDP (802.1AB); LLDP-MED; SSHv2; V.24; HTTP; HTTPS; Traps; SNMP v1/v2/v3; Telnet

### Diagnostics

- Management Address Conflict Detection; MAC Notification; Signal Contact; Device Status Indication; TC/Dump; LEDs; Systolg; Persistent Logging on A/C, EMAIL Notification; Port Monitoring with Auto-Disable; Link Flap Detection; Overload Detection; Duplex Mismatch Detection; Link Speed and Duplex Monitoring; RMON (1,2,3,6); Port Mirroring 1:1; Port Mirroring 8:1; Port Mirroring 16:1; RSPAN; SFLOW; VLAN Mirroring; System Information; Self-Tests on Cold Start; Copper Cable Test; SPF Management; Configuration Check Dialog; Switch Dump

### Configuration

- Management: Automatic Configuration Uno (roll-back); Configuration Fingerprint; Text-based Configuration File (XML); BOOTP/DHCP Client with Auto-Configuration; DHCP Server: per Port; DHCP Server: Pools per VLAN; AutoConfiguration Adapter ACA21/22 (USB); HII/Discovery; DHCP Relay with Option 82; Command Line Interface (CLI); CLI Scripting; Full-featured MBN Support; Web-based Management; Context-sensitive Help

### Security

- MAC-based Port Security; Port-based Access Control with 802.1X; Guest/unknownauthenticated VLAN; Integrated Authentication Server (IAS); RADIUS VLAN Assignment; RADIUS Policy Assignment; Multi-Client Authentication per Port; MAC Authentication Bypasses; DHCP Snooping; Dynamic ARP Inspection; Denial-of-Service Prevention; LEMP; Ingress MAC-based ACL; Ingress IPvx-based ACL; Time-based ACL; VLAN-based ACL; Ingress VLAN-based ACL; ACL Flow-based Limiting; Access to Management restricted by VLAN; Device Security Indication; Audit Trail; CLI Logging; HTTPS Certificate Management; Restricted Management Access; Appropriate Use Banner; Configurable Password Policy; Configurable Number of Login Attempts; SNMP Logging; Multiple Privilege Levels; Local User Management; Remote Authentication via RADIUS; User Account Locking

### Time Synchronization

- PTPv2 Transparent Clock two-step; PTPv2 Boundary Clock; Buffered Real Time Clock; SNTP Client; SNTP Server

### Industrial Profiles

- EtherNet/IP Protocol; ModbusTCP; PROFINET IO Protocol

### Miscellaneous

- PoE (802.3at); PoE+ (802.3at); PoE+ Manual Power Management; PoE Fast Startup; Manual Cable Crossing; Port Power Down

### Routing

- IP/UDP Helper; Full Wire-Speed Routing; Port-based Router Interfaces; VLAN-based Router Interfaces; Loopback Interface; ICMP Filter; Net-directed Broadcasts; 1:1 NAT; OSPFv2v; RIP v1/v2; ICMP Router Discovery (IRD); Static Unicast Routing; Proxy ARP; Static Route Tracking

### Multicast Routing

- IGMP v1/v2/v3; IGMP Proxy (Multicast Routing)

### Approvals

- Safety of Industrial Control Equipment: cUL 09850-1
- Road Vehicles: E1, GL
- Along Track and Onboard Train: EN 50155; EN 50121-4; EN 45545
